DETAILED ACTION

Receipt is acknowledged of the request for continued examination and amendment filed 06/08/2009. An information disclosure statement was also filed on 06/08/2009.

The rejection under 35 USC 112, first paragraph is withdrawn in view of applicant's showing of support form the original specification.

The following is a new rejection of the claims:

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1,3,4, 7-37 and 84-94 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-34, 37-41 of copending Application No. 10/298,112 (US'112). Although the conflicting claims are not identical, they are not patentably distinct from each other because US'112 claims a demineralized bone matrix composition comprising fibers of dimineralized bone matrix with a length between 250 um to 2 mm, and an aspect ratio of greater than about 4 (see claim 1). A calcium phosphate additive is found at claim 11. The dimineralized bone may be present in an amount greater than 40% (claim 20). As su8ch, those of ordinary skill would have been able to claim the instant composition with a reasonable expectation of similar therapeutic results given the claims of US'112. The instant claims would have therefore been obvious to one of ordinary skill in the art at the time of invention given the claims of copending US'112.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.
